

15th International Conference on Water, Air, and Soil Pollution and Treatment (Wasa 2020): A Global Platform for Environmental Innovations

The 15th International Conference on Water, Air, and Soil Pollution and Treatment (Wasa 2020) is set to take place in the beautiful coastal city of Qingdao, China, from September 13th to 15th, 2020. This highly anticipated conference brings together experts, researchers, policymakers, and industry leaders from around the world to exchange knowledge and insights on the pressing environmental challenges of today.

With a focus on water, air, and soil pollution and their treatment, Wasa conferences have established themselves as a premier venue for the presentation and discussion of groundbreaking research in the field. This year's conference aims to advance the global understanding of environmental issues and explore innovative solutions that can shape a sustainable future.

Key Themes and Topics

Wasa 2020 covers a wide range of themes and topics, ensuring that all significant aspects of water, air, and soil pollution and treatment are addressed. Some of the main themes include:

1. Water Quality Monitoring and Assessment
2. Air Pollution Control and Modeling
3. Soil Remediation Techniques
4. Environmental Impact Assessment
5. Sustainable Waste Management
6. Water Resource Management
7. Climate Change Mitigation and Adaptation

These themes encompass various subtopics, such as emerging contaminants, wastewater treatment technologies, air quality monitoring systems, and ecological risk assessment, to name just a few. Wasa 2020 strives to encourage interdisciplinary collaboration, ensuring that all perspectives are considered in the search for effective solutions.

International Speakers and Workshops

One of the major attractions of Wasa 2020 is the gathering of renowned experts and thought leaders from across the globe. The conference boasts an impressive lineup of international speakers, each with significant contributions to their respective fields. Attendees can expect inspiring keynote addresses, thought-provoking panel discussions, and interactive workshops that offer valuable insights and practical knowledge.

The workshops at Wasa 2020 offer participants a unique opportunity to engage in hands-on learning experiences. These sessions are designed to enhance practical skills, promote collaborative problem-solving, and empower attendees to make a real difference in their environmental endeavors.

Conference Venue: Qingdao, A Picturesque Coastal City

Set against the backdrop of the Yellow Sea, Qingdao provides an idyllic setting for this international conference. Its stunning beaches, charming European-style architecture, and vibrant cultural scene make it a must-visit destination for conference attendees. Participants will have ample opportunities to explore the city's rich history, sample its renowned cuisine, and appreciate its natural beauty.

Qingdao is also home to several prominent environmental landmarks, such as the Laoshan National Forest Park and the Qingdao Municipal Wastewater Treatment Plant. These sites serve as reminders of the city's commitment to sustainable

development and provide inspiration for the important work carried out at Wasa 2020.

Call for Papers and Submission Guidelines

Wasa 2020 invites researchers, industry professionals, and policymakers to submit their papers and contribute to the conference's goals. Abstracts and full papers will undergo a thorough peer-review process to ensure high standards of academic excellence.

The conference organizers encourage submissions that demonstrate originality, present cutting-edge research, and offer practical solutions to environmental challenges. All accepted papers will be published in the conference proceedings, providing a valuable resource for the scientific community.

Unlocking a Sustainable Future

As the world grapples with the urgent need for sustainable practices, conferences like Wasa 2020 are crucial in fostering the exchange of ideas and encouraging collaboration across borders. The conference provides a global platform for researchers, policymakers, and industry leaders to connect, learn from each other, and contribute to the development of innovative solutions to environmental problems.

By focusing on water, air, and soil pollution and treatment, Wasa 2020 addresses key challenges that directly impact human health, ecosystems, and the planet as a whole. Through its diverse program, international speakers, and engaging workshops, the conference aims to pave the way for a greener and more sustainable future.

Join us at the 15th International Conference on Water, Air, and Soil Pollution and Treatment in Qingdao, China from September 13th to 15th, 2020, and play your part in shaping our collective environmental destiny.

The two-volume set LNCS 12385 + 12386 constitutes the proceedings of the 15th International Conference on Wireless Algorithms, Systems, and Applications, WASA 2020, which was held during September 13-15, 2020. The conference was planned to take place in Qingdao, China; due to the COVID-19 pandemic it was held virtually. The 67 full and 14 short papers presented in these proceedings were carefully reviewed and selected from 216 submissions. The papers focus on data path algorithms; control path algorithms; network protocol design; network security; network services; and cloud computing.
