

An Emerging New Literacy For Global Audience - Routledge Research In Education 138

In today's rapidly evolving world, literacy has taken on a whole new meaning. With advancements in technology and the widespread presence of the internet, being literate now extends beyond traditional reading and writing skills. An emerging new literacy has emerged that caters to a global audience and requires individuals to navigate through a vast amount of information and media in various formats.

The importance of this new literacy has not gone unnoticed, with scholars and researchers recognizing the need to study and understand it better. One such comprehensive research book is "Routledge Research in Education 138: An emerging new literacy for a global audience" edited by renowned experts in the field.

Understanding the New Literacy

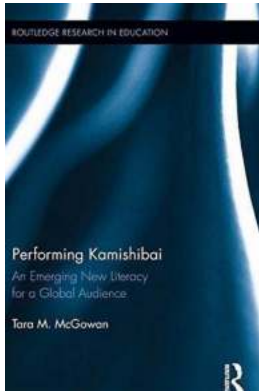

The new literacy discussed in this book goes beyond simple reading and writing proficiency. It encompasses various skills and competencies essential for individuals to thrive in the digital age. These include critical thinking, media literacy, digital literacy, information literacy, and cultural literacy.

Performing Kamishibai: An Emerging New Literacy for a Global Audience (Routledge Research in Education Book 138)

According to the research presented in the book, these skills are crucial for navigating the vast amount of information available online, understanding different perspectives, critically evaluating sources, and participating effectively in a global society. Individuals need to be able to comprehend and analyze various forms of media, including written, visual, and audio content, to make informed decisions and engage meaningfully with others.

The Role of Education

Education plays a pivotal role in fostering and developing this new literacy among individuals. The book emphasizes the need for educators to incorporate digital and media literacy skills into curriculum and teaching methods. By equipping students with the necessary skills to navigate the digital landscape, educators can empower them to become active participants and critical thinkers.

Additionally, the research presented in "Routledge Research in Education 138" explores the challenges and opportunities in implementing this new literacy across different educational settings and cultural contexts. It analyzes the role of technology in education and provides insights into effective teaching strategies for developing new literacy skills.

The Global Audience

One of the remarkable aspects of the new literacy is its ability to connect individuals from all around the world. As the internet breaks down geographical barriers, people now have access to information, perspectives, and cultures at a global scale.

The research delves into how individuals can leverage this interconnectedness to develop cultural literacy and understand and appreciate diverse viewpoints. It explores ways in which the new literacy can facilitate cross-cultural communication, empathy, and global citizenship.

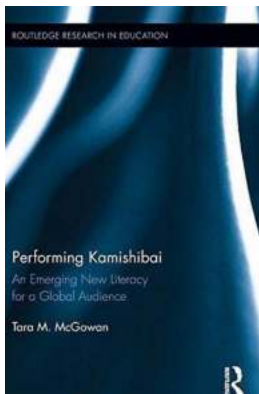

Implications for the Future

The emerging new literacy discussed in "Routledge Research in Education 138" carries significant implications for the future. As technology continues to advance and the global community becomes increasingly interconnected, being equipped with the necessary skills to navigate this digital landscape becomes more critical than ever.

Individuals who possess this new literacy will have a competitive advantage in the job market and be better equipped to interact and engage with others in diverse contexts. Moreover, these skills will empower individuals to be active participants in shaping a more inclusive and progressive global society.

In , the emergence of a new literacy for a global audience brings forth a paradigm shift in our understanding of literacy. "Routledge Research in Education 138" offers comprehensive insights into this emerging literacy, highlighting the skills required, the role of education, and the implications for the future.

As our world becomes increasingly interconnected and reliant on digital technologies, individuals must adapt and develop these new literacy skills to thrive and navigate the global landscape successfully. By incorporating this new literacy into education and empowering individuals, we can foster a society that is well-equipped to face the challenges and opportunities of the digital age.

Kamishibai (paper-theater), a Japanese picture-storytelling medium, is gaining global interest as we move from a text-based culture to one that emphasizes multiple semiotic systems and performance. This is the first volume to explore the potential of kamishibai as a dynamic "new" interactive medium for teaching multimodal communication and shows how synchronizing oral, visual and gestural modes develops students' awareness of all modes of communication as potential resources in their learning. By examining the multiple modes involved in kamishibai through actual student performances over several venues, this volume overturns commonly held expectations about literacy in the classroom and provides a critical perspective on assumptions about other media. It offers much-

needed information about a medium that is attracting interest from educators, academics and artists worldwide.
