Is finding really healthy and organic food ever more difficult? Grow them and raise them yourself!

You'll learn:

- Benefits of Growing Your Own Fruit, Vegetables, Herbs and Fish Using Aquaponics
- Different Aquaponic Systems

- Best Plants to Grow
- How to Choose Your Fish
- Common Mistakes in Aquaponics and How to Avoid Them
- Advanced Techniques – How to Level Up Your System
- Maximizing Your System

In *Aquaponics for Beginners, Your Step-by-Step Guide to Build Your Own Aquaponics Garden System That Will Grow Organic Vegetables, Fruits, Herbs and Raising Fish* you will learn everything you need to know about the latest craze that is taking the gardening world by storm.

From making sure that you design a system that is best suited to your needs, to understanding each of the different plants that can be grown in the different methods of aquaponics, each step is going to get you closer to where you want to be: self-sufficient and healthier.

Once you have successfully been able to establish your own aquaponics system, you will be amazed by how little work is involved in being able to keep and maintain it. The hardest part is getting the system up and running and getting it to cycle. This means ensuring that the waste produced by the fish becomes transformed into nutrients suitable for the plants by beneficial bacteria. The cycling process can take up to three months which can be quite a while to be patient, but it is necessary and this wait will ensure the overall success of your aquaponic system moving forward.

Think of how much you are going to benefit from being able to grow your own 100% organic crops right where you are, and if you choose the right fish to stock,

you could even have access to regular protein as well!

This book provides you with all the information that you will need to make an educated choice on plants and fish, while factoring in the most important elements of pH and temperatures. Once you get the balance right, the rest is smooth sailing from there.
