"A Date with Puzzles" tries to make the reader integrate logic with daily life by solving puzzles based on the countless fascinating patterns we find around us.

Let us look at some of the undiscovered patterns on our mobile keypad.

The sum of the middle column [ $2+5+8=15$ ], the sum of the middle row [ $4+5+6=15$ ] and the sum of both diagonals is also 15.

Such infinite puzzles with thought-provoking patterns can be found all around us in our daily life. Be it a wall clock, an odometer, even in the colors we see. A closer look is all that is needed at the mundane objects around us to find the patterns that exist all around us.

In just over 100 pages, the objective of this book is to ignite an interest in reasoning. “A Date with Puzzles” takes a complex subject such as logical reasoning and uncovers the simple fun found in it through fresh puzzles.
