

# Discover the Excitement at the 25th European Symposium On Research In Computer Security Esorics 2020 Guildford!

Are you ready for an incredible gathering of cybersecurity experts, researchers, and enthusiasts from across Europe and beyond? Look no further than the highly

anticipated 25th European Symposium On Research In Computer Security (ESORICS) 2020, taking place in the historic city of Guildford.

ESORICS has always been a prime platform for showcasing cutting-edge research and fostering collaboration among world-leading experts in computer security. From September 14th to 18th, Guildford will be buzzing with excitement as conference attendees immerse themselves in a week-long program filled with engaging presentations, workshops, and networking opportunities.

## Computer Security – ESORICS 2020: 25th European Symposium on Research in Computer Security, ESORICS 2020, Guildford, UK, September 14–18, 2020, Proceedings, ... Notes in Computer Science Book 12308)

### The Cutting-Edge Research

ESORICS is renowned for its rich program of in-depth research presentations, covering a wide range of topics within computer security. This year's symposium

promises to be no different, with experts from academia and industry showcasing their latest findings and innovations.

Some of the exciting research areas to be featured at ESORICS 2020 include:

- Secure Machine Learning
- Cryptocurrency Security
- Privacy and Anonymity
- Network Security
- Mobile Security
- Threat Detection and Mitigation
- IoT Security

With such a diverse and comprehensive program, ESORICS 2020 offers a unique opportunity to dive into the challenges and advancements in the ever-evolving world of computer security.

## **Engaging Workshops**

In addition to the research presentations, ESORICS 2020 will also host a series of interactive workshops designed to encourage collaboration and knowledge sharing among participants. These workshops provide a platform for in-depth discussions, hands-on exercises, and the exchange of practical experiences related to various domains of cybersecurity.

Topics covered in the workshops include:

- AI and Machine Learning in Security and Privacy
- Security Analytics and Data Science
- Blockchain Technology and Security
- Secure Software Engineering
- Emerging Threats and Defenses
- Human-Focused Security

Attendees will have the chance to participate in these workshops, gaining valuable insights and skills from leading experts in their respective fields.

### **The Guildford Experience**

Apart from the informative sessions and workshops, ESORICS 2020 offers attendees a chance to explore the beautiful city of Guildford. Known for its rich history, picturesque landscapes, and vibrant culture, Guildford provides the perfect setting for a memorable conference experience.

Attendees can take a leisurely stroll through ancient streets, visit local attractions such as Guildford Cathedral, or enjoy the stunning views from Guildford Castle. The city also offers a wide range of dining and entertainment options, ensuring that participants can unwind and relax after an intense day of learning and networking.

**Get Your Tickets Now!**

Don't miss out on the opportunity to be a part of the 25th European Symposium On Research In Computer Security ESORICS 2020. Join hundreds of fellow cybersecurity enthusiasts, researchers, and professionals in Guildford this September.

To secure your spot and learn more about the symposium program, visit the official ESORICS 2020 website. Get ready for an unforgettable week of groundbreaking research, insightful discussions, and a chance to connect with the brightest minds in the field!

So mark your calendar and get ready for ESORICS 2020 in Guildford. We look forward to seeing you there!

The two volume set, LNCS 12308 + 12309, constitutes the proceedings of the 25th European Symposium on Research in Computer Security, ESORICS 2020,

which was held in September 2020. The conference was planned to take place in Guildford, UK. Due to the COVID-19 pandemic, the conference changed to an online format.

The total of 72 full papers included in these proceedings was carefully reviewed and selected from 366 submissions. The papers were organized in topical sections named: database and Web security; system security; network security; software security; machine learning security; privacy; formal modelling; applied cryptography; analyzing attacks; post-quantum cryptography; security analysis; and blockchain.
