

# Discover the Exciting World of Artificial Intelligence at the 16th Pacific Rim International Conference

Are you fascinated by the rapidly evolving field of Artificial Intelligence (AI)? Do you want to learn from the brightest minds and explore cutting-edge advancements in this field? Look no further! The 16th Pacific Rim International Conference on Artificial Intelligence (Cuvu) is just what you need. With an impressive lineup of speakers, workshops, and research presentations, this conference promises to be a game-changer in the realm of AI.

## Breaking Barriers in Artificial Intelligence

The 16th Pacific Rim International Conference on Artificial Intelligence (PRICAI-Cuvu) is a premier platform for researchers, practitioners, and enthusiasts in the field of AI to come together and exchange ideas. Hosted in the beautiful coastal city of Cuvu, this conference aims to break barriers and push the boundaries of AI.

As AI continues to revolutionize various industries, it becomes imperative for individuals involved in AI research to stay updated with the latest trends and discoveries. PRICAI-Cuvu presents an unparalleled opportunity to gain insights from renowned experts, collaborate with fellow researchers, and immerse oneself in the world of AI.

Print length	: 1161 pages
Hardcover	: 480 pages
Item Weight	: 1.58 pounds
Dimensions	: 4.92 x 1.85 x 8.07 inches

### Outstanding Keynote Speakers

The conference will feature keynote speeches from some of the most influential figures in the field of AI. These speakers bring with them a wealth of knowledge and experience, making their talks invaluable for all attendees. From industry leaders to academic experts, the speakers at PRICAI-Cuvu cover a diverse range of AI topics, ensuring there is something for everyone.

One of the keynote speakers is Dr. Elizabeth Chen, a pioneer in the field of machine learning and data science. With numerous patents to her name and decades of experience, Dr. Chen's insights into the future of AI are sure to captivate the audience. Her talk titled "From Perception to Decision: The Journey of AI" promises to shed light on the fascinating intersection of AI and decision-making processes.

Another keynote speaker at PRICAI-Cuvu is Professor Hiroshi Ishiguro, renowned for his groundbreaking research in humanoid robotics. His talk,

"Blurring the Boundaries: Human-like Robots and AI," delves into the advancements in robotics and the integration of AI into humanoid forms. Attendees can expect to be enthralled by Professor Ishiguro's discussion on the potential impact of robotic AI in various industries.

## **Interactive Workshops and Tutorials**

PRICAI-Cuvu offers a range of interactive workshops and tutorials designed to deepen participants' understanding of AI. Whether you are new to the field or a seasoned professional, these sessions provide a hands-on learning experience that is both engaging and informative.

One such workshop is "Deep Learning for Computer Vision," led by Dr. Sophia Zhang, an accomplished researcher in computer vision and deep learning. Participants will have the opportunity to learn about the latest techniques and tools used in computer vision applications. From object detection to image recognition, this workshop covers a wide array of topics that are at the forefront of AI research.

For those interested in natural language processing and machine translation, the tutorial on "Neural Networks for Language Processing" conducted by Dr. Michael Wong is a must-attend. Dr. Wong's expertise in language technologies guarantees an insightful session packed with practical knowledge and real-world applications.

## **Research Presentations and Poster Sessions**

The 16th Pacific Rim International Conference on Artificial Intelligence is also a platform for researchers to present their latest findings and showcase their work. Researchers from around the world gather at PRICAI-Cuvu to discuss their

breakthroughs, engage in intellectual discussions, and receive valuable feedback from peers.

The conference's poster sessions offer an interactive setting for researchers to present their work in a visually appealing manner. This format encourages discussions and fosters collaboration between researchers with similar interests. You can expect to witness groundbreaking research on topics such as deep learning, natural language processing, machine vision, and much more.

## **Networking Opportunities and Social Events**

Aside from the intellectually stimulating agenda, PRICAI-Cuvu provides ample networking opportunities to forge new connections and collaborate with like-minded individuals. Whether during coffee breaks, lunches, or dedicated networking sessions, you will have the chance to interact with renowned researchers, industry professionals, and fellow attendees.

Furthermore, special social events are organized to provide a relaxed environment for socializing and building lasting relationships. The conference banquet offers a delightful evening of fine dining and entertainment, making it the perfect setting to unwind and connect with others in the AI community.

## **Experience the Cuvu Advantage**

The 16th Pacific Rim International Conference on Artificial Intelligence is a premier event that combines knowledge-sharing, networking, and innovation in the field of AI. By attending PRICAI-Cuvu, you can stay at the cutting edge of AI research, broaden your horizons, and contribute to the advancement of this fascinating field.

Join us in Cuvu as we embrace the future of AI and explore the endless possibilities that lie ahead. Don't miss out on this exceptional conference where great minds converge to shape the future of artificial intelligence.

Hardcover	: 480 pages
Item Weight	: 1.58 pounds
Dimensions	: 4.92 x 1.85 x 8.07 inches

This three-volume set LNAI 11670, LNAI 11671, and LNAI 11672 constitutes the thoroughly refereed proceedings of the 16th Pacific Rim Conference on Artificial Intelligence, PRICAI 2019, held in Cuvu, Yanuca Island, Fiji, in August 2019.

The 111 full papers and 13 short papers presented in these volumes were carefully reviewed and selected from 265 submissions. PRICAI covers a wide range of topics such as AI theories, technologies and their applications in the areas of social and economic importance for countries in the Pacific Rim.
