: Drawing Dinosaurs

This book is a beginning guide to help you begin drawing dinosaurs and it contains several examples to follow. The steps are designed in a way that can be applied to either digital drawing (drawing on a tablet) or traditionally (drawing on a paper). Although this book is for drawing dinosaurs, the process of creating the figures and applying colors in them can be applied to many other things you may like to draw. During the process, you will learn how to use different lines and how to apply different color tones to your drawing instead of simply filling them with one color tone. The tutorials will begin with an easy example carefully explained, and then gradually increase in difficulty along the way.
