

Experience the Majestic Ice Age Flood Tour In Full Color

The Ice Age Floods were one of the most remarkable geological events in the history of North America. These massive floods occurred around 15,000 years ago, reshaping the landscape and leaving behind stunning natural wonders. If you are a nature lover and enjoy immersing yourself in awe-inspiring scenery, the Ice Age Flood Tour is an experience you simply cannot miss.

Witness the Power of Nature

Imagine standing on a cliff overlooking a vast canyon with vibrant ice blue waters rushing through it. As you look around, you realize that these massive canyons were carved out by the sheer force of water during the Ice Age Floods. The power of nature is unrivaled, and this tour gives you a front-row seat to witness its grandeur.

Ice Age Flood Tour in Full Color: Portland to Prosser, Grand Coulee and Back

Explore Unique Geological Formations

During the Ice Age Floods, massive volumes of water were released from melting ice sheets, resulting in catastrophic floods. These floods carved out deep canyons, created immense waterfalls, and formed unique geological formations that are now part of the landscape. From towering cliffs to basalt columns, each formation tells a story of the Earth's history.

Discover the Scenic Columbia River

One of the highlights of the Ice Age Flood Tour is the opportunity to explore the stunning beauty of the Columbia River. With its towering cliffs, lush greenery, and crystal-clear waters, the Columbia River is a sight to behold. As you venture along its banks, you'll be mesmerized by the breathtaking views and immerse yourself in the tranquility of nature.

Encounter Diverse Wildlife

The Ice Age Flood Tour is not just about admiring picturesque landscapes; it's also a chance to encounter diverse wildlife. From bald eagles soaring through the sky to graceful deer roaming the valleys, you'll have the opportunity to observe and appreciate the rich biodiversity that thrives in this unique environment.

A Journey Through Time

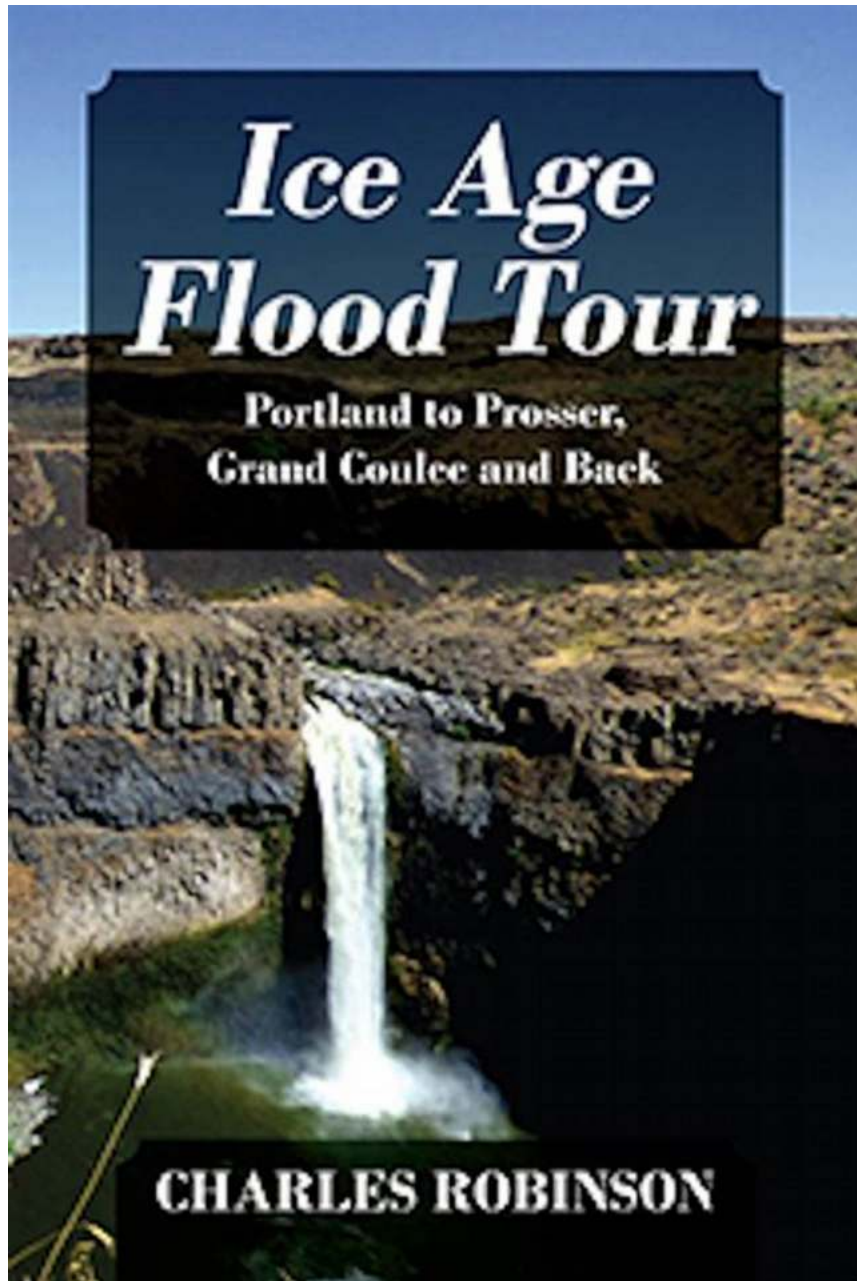

During the Ice Age Flood Tour, you'll not only witness the beauty of nature but also embark on a journey through time. Guides will share fascinating stories and information about the geological events that unfolded during the floods, providing insights into the Earth's history and the impact of these extraordinary phenomena on the landscape.

Immerse Yourself in Full Color

While words can paint a picture, seeing the Ice Age Floods in full color is an experience like no other. Vibrant hues of blue, green, and gold combined with the timeless beauty of the surrounding scenery create a sight that will stay etched in your memory forever. So, bring your camera and capture these magical moments to relive the adventure whenever you desire.

Plan Your Ice Age Flood Tour Today

If you are ready to embark on a journey through time, witness the power of nature, and immerse yourself in full color, book your Ice Age Flood Tour today. Whether you're a solo traveler seeking solitude or a nature enthusiast looking for an extraordinary adventure, this tour offers an experience you won't want to miss. Don't wait! Explore the ancient landscapes that were carved by the Ice Age Floods and create unforgettable memories.

During my recent positions as an Interpretation Park Ranger at Lake Roosevelt National Recreation Area, I became very interested in Lake Missoula Ice Age Flood(s) that shaped the landscape of Eastern Washington and the Columbia River Gorge between Oregon and Washington. As a part of my position, we were asked to conduct research into the flood in order that we might explain or interpret the unique geologic features that are so evident in the park. Lake Roosevelt is the lake behind Grand Coulee Dam. The lake now fills the Grand Coulee that was carved out by the massive Glacial Lake Missoula Flood(s) I was impressed by the fact that there are relatively few guides to the features of the flood in Washington. Also, what I was seeing seemed to contradict the view of many geologists that there were multiple floods, up to as many as 100. This interpretation also contradicted my view and that of many geologists commonly referred to as creationists. Their view of just one or at most a few floods is also more in keeping with my view as a Christian and belief that God created the heavens and the earth a few thousand years ago rather than having evolved over millions or billions of years. The National Park Service has begun to develop an Ice Age Flood Tour, consisting of a driving tour of the prominent features. There is little more than a web site describing some of the features and a map of some of the features. Because of that I decided to tour much of the area and put together a tour of the features that I had visited along with maps and descriptions of points along the route. The map was specifically designed for the use of my family to use so that they might be able to understand the unique and amazing features and

landscapes created by the flood(s). It is for that reason that my tour passes through my hometown of Prosser, Washington. The Second Edition was revised and updated with the sensitive information contained in the First Edition removed. In this Third Edition, the aerial photographs showing the terrain through which the routes travel, the photographs and maps have all been reproduced in color for easy reference.
