

# **Experience the Second International Conference DAI 2020 in Nanjing, China: Unveiling the Future of Artificial Intelligence**

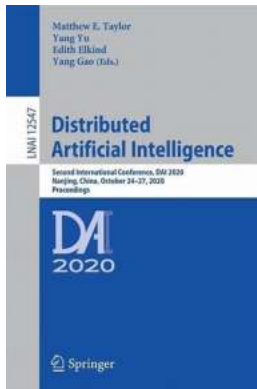

Welcome to the Second International Conference on Distributed Artificial Intelligence (DAI) 2020, the premier event that brings together leading experts, researchers, and enthusiasts from around the world to explore the latest advancements and trends in the field of artificial intelligence. From the picturesque city of Nanjing, China, from October 24-27, 2020, this conference promises to be a truly transformative experience.

## **An Insight into the World of DAI**

Distributed Artificial Intelligence (DAI) is a subfield of artificial intelligence that focuses on the study and development of intelligent systems that can effectively communicate and cooperate with other agents in a decentralized manner. It revolves around the concept of intelligent agents, which are capable of making independent decisions and collaborating with other agents to achieve a common goal.

With the rapid advancements in technology and the increasing prevalence of complex real-world problems, DAI has gained significant attention in both academic and industrial circles. It finds applications in various domains, including smart cities, autonomous vehicles, healthcare systems, and more.

### The Importance of Conferences

Conferences serve as a crucial platform for researchers and professionals to exchange knowledge, present their latest findings, and foster collaborations. The **Second International Conference DAI 2020** plays a vital role in the advancement of DAI by bringing together the brightest minds in the field and facilitating discussions on cutting-edge topics.

By attending this conference, you will have the opportunity to:

- **Network with experts:** The conference provides a unique opportunity to network with leading researchers, practitioners, and decision-makers in the field of DAI. Engage in fruitful conversations, share insights, and form collaborations that can shape the future of artificial intelligence.
- **Stay updated on the latest trends:** With keynote speeches, panel discussions, and paper presentations, the conference offers a comprehensive overview of the state-of-the-art advancements and emerging

trends in DAI. Stay ahead of the curve and gain valuable insights into the future of artificial intelligence.

- **Showcase your research:** If you have been working on groundbreaking research in the field of DAI, this conference provides the ideal platform to present your work to a highly knowledgeable and receptive audience. Share your discoveries, receive feedback, and establish your presence in the academic community.
- **Visit Nanjing, China:** Besides the intellectual stimulation offered by the conference, Nanjing, China, provides a rich cultural experience. Explore the city's historical landmarks, savor the local cuisine, and immerse yourself in the traditions and customs of this vibrant city.

## **What to Expect at DAI 2020**

The Second International Conference DAI 2020 promises an exciting agenda filled with thought-provoking sessions, interactive workshops, and engaging discussions. Here are some highlights:

### **1. Keynote Speeches by Industry Leaders**

Renowned experts and influential figures in the field of artificial intelligence will deliver inspiring keynote speeches, sharing their insights and predictions on the future of DAI. Prepare to be captivated by their vision and gain valuable insights for your own work.

### **2. Panel Discussions and Paper Presentations**

The conference will feature panel discussions where panelists will debate on key topics shaping the future of DAI. Additionally, researchers and experts from around the world will present their cutting-edge research through paper

presentations. Engage in enlightening discussions, ask questions, and broaden your understanding of the subject matter.

### **3. Workshops and Tutorials**

The conference will host a range of workshops and tutorials designed to provide participants with hands-on experience and in-depth knowledge on specific topics within DAI. Whether you are new to the field or a seasoned professional, these interactive sessions offer an excellent opportunity to enhance your skills.

### **4. Networking Events**

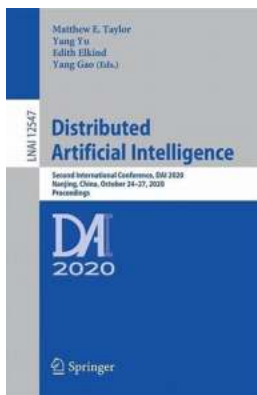

Forge professional connections, exchange ideas, and expand your network during the various networking events organized throughout the conference. These events provide a relaxed and informal setting for participants to interact and build valuable relationships with peers and experts.

### **Register Now to Secure Your Spot**

The Second International Conference DAI 2020 in Nanjing, China, is your gateway to the future of artificial intelligence. Don't miss this unparalleled opportunity to be a part of groundbreaking discussions, gain valuable insights, and make valuable connections in the field of DAI.

To register for the conference and explore the detailed schedule, visit the official DAI 2020 Conference website.

Join us from October 24-27, 2020, in Nanjing, China, and embark on an enlightening journey into the world of Distributed Artificial Intelligence. Get ready to witness the cutting edge of AI and be a part of shaping the future of this transformative field!

This book constitutes the refereed proceedings of the Second International Conference on Distributed Artificial Intelligence, DAI 2020, held in Nanjing, China, in October 2020.

The 9 full papers presented in this book were carefully reviewed and selected from 22 submissions. DAI aims at bringing together international researchers and practitioners in related areas including general AI, multiagent systems, distributed learning, computational game theory, etc., to provide a single, high-profile, internationally renowned forum for research in the theory and practice of distributed AI.

Due to the Corona pandemic this event was held virtually.
