

Grow Up in Pain Amendment28 - How It Can Change Lives

Potential amendments me & Nova came up with cause why not

Amendment 28 - term limit of 6 yrs for Congress, 3 House or 1 Senate, to be applied to all Congressmen elected after ratification.

Amendment 29 - changing of election of Senators from direct to indirect known as the Oregon system. The people will select a # of candidates that their state legislatures will then select from.

Amendment 30 - each bill/law proposed must include only 1 issue to prevent the passing/funding of ride on additions. For example a bill for Military spending can't include funding for agencies/projects outside of that.

Amendment 31 - extend 1st Amendment rights to defend against state/corporate censorship. If companies do not abide by the new amendment they will lose their Section 230 protection until such a time they practice good faith moderation as required.

Amendment 32 - ending of birthright citizenship. A child shall only be granted it if one of their parents is a native or naturalized citizen. If neither are they will be considered a citizen of whatever country their parents came from.

Amendment 33 - any enlisting in the US Military must give up dual citizenship, if they have one, for the duration of their enlistment. If they do not they will be barred from enlistment until such time they do as requested. If they wish to regain it upon the end of their enlistment that will not be barred though.

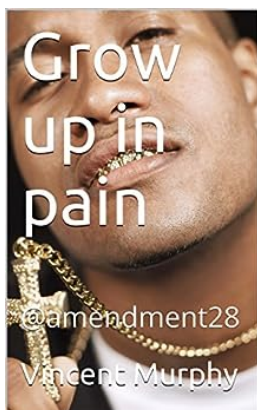

So what do you guys think? Good mix of LibRight & AuthRight ideals I'd say. BTW I thought about adding in like 2 Timocrat ones but I'll save those for my own list.
