In this way, alterity becomes a catalyst for personal growth and deeper connections.

This book argues that contemporary dance, imagined to have a global belonging, is vitiated by euro-white constructions of risk and currency that remain at its core. Differently, the book reimagines contemporary dance along a “South-South” axis, as a poly-centric, justice-oriented, aesthetic-temporal category, with intersectional understandings of difference as a central organizing principle. Placing alterity and heat, generated via multiple pathways, at its center, it foregrounds the work of South-South artists, who push against constructions of “tradition” and white-centered aesthetic imperatives, to reinvent their choreographic toolkit and respond to urgent questions of their times. In recasting the grounds for a different “global stage,” the argument widens its scope to indicate how dance-making both indexes current contextual inequities and broader relations of social, economic, political, and cultural power, and inaugurates future dimensions of justice.
