Have you ever wondered how to bring dinosaurs to life on paper? Drawing dinosaurs can be a thrilling and imaginative experience for both kids and adults. In this step-by-step guide, we will show you how to draw three popular dinosaurs: Abrosaurus, Rex, and Saltasaurus, to get you started on your Jurassic artistic journey!

Step 1: Abrosaurus

The Abrosaurus is a lesser-known dinosaur that roamed the Earth during the Late Jurassic period. It was a herbivorous dinosaur known for its long neck and tail. Let's start by drawing the basic shape of the body. Begin with a curved line for the back and connect it with a larger oval shape for the body. Add another smaller oval shape for the head at one end of the body.

Step 2: Rex

Ah, the mighty Tyrannosaurus Rex. One of the most well-known and fearsome predators from the Late Cretaceous period. Let's begin by sketching the basic structure of the T-Rex. Start with a large oval shape for the body. Add a smaller oval shape for the head and a long line for the tail.

How to Draw a T-Rex

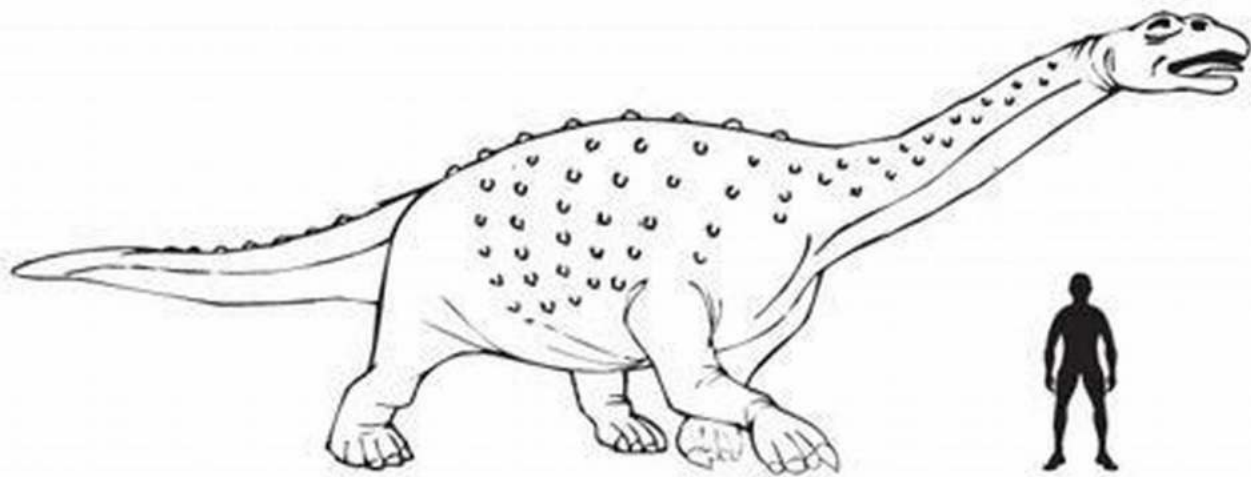

Next, add details to enhance your T-Rex drawing. Draw a curved line for the back and connect it with the head. Add two small circles for the eyes and a larger circle for the open mouth. Fill in sharp, triangular teeth for that signature T-Rex look!

Step 3: Saltasaurus

Now it's time to draw the armored dinosaur, Saltasaurus. The Saltasaurus lived during the Late Cretaceous period and was known for its defensive armor made

up of bony plates. Start with a large oval shape for the body and a smaller oval for the head.
