This spectacular CGP Workbook features an array of Biology, Chemistry and Physics questions, all set at the perfect difficulty for students in Year 8. It's absolutely spot on for honing those all-important Science skills.

The questions cover a range of techniques and topics, and aim to challenge common misunderstandings, prepare students for the maths and practical sections of the course, and help put what they've learned into context. Topics also include a selection of warm-up questions - to test what students already know about each topic. We've rounded the book off with a stack of mixed test-style questions to bring everything students have learned together in one place.

Full answers are provided in the back of the Kindle.
