Motorcycle Safety (Vol. 1) Accident-Free Riding – It's Not By Accident

Previous motorcycle safe riding books have emphasized the physical skills required for motorcycling, i.e., braking, accelerating, cornering, etc., but my experience is these skills have very little to do with motorcycle safe riding.

Accident-Free Riding on the street is a physical exercise 10% of the time and a mental exercise 90% of the time, but it's this mental aspect of road riding that's been neglected by past motorcycle safe riding authors and instructors.

Perhaps they didn't have five decades of motorcycling experience or the hundreds of thousands of accident-free miles it requires to acquire a proven body of hands-on knowledge. Perhaps they never became self-aware motorcyclists who could effectively communicate Accident-Free Riding Techniques. I used Accident-Free Riding Techniques for decades before I was aware I had them. They were acquired instinctively after decades of on and off-road riding and racing. Realizing that I had them was an epiphany and it led to my obsession to share the Accident-Free Riding Techniques I had unconsciously learned.

My first Accident-Free Riding article in Motorcyclist's September 2010 issue really struck a positive chord with readers. Riders were, and are, clamoring for Accident-Free Riding Techniques they can learn and apply.

As a life-long motorcyclist with five decades of riding experience and hundreds of thousands of accident-free miles and an unscathed motorcycle with 140,000 miles ridden almost exclusively on twisty two-lane roads (the most dangerous type), I'll let you decide if what I've learned helps you before I become another self-proclaimed motorcycle safe-riding expert.

Before you pay hundreds of dollars for track days, safe riding courses, or for the advice of a self-proclaimed motorcycle safe-riding expert, you may want to ask that instructor or author if they've ridden accident-free, or almost accident-free for hundreds of thousands of miles on two lane roads over several decades. If they haven't, you may want to view their advice with some skepticism. You can't learn

accident-free riding from someone who crashes - the only thing you can learn from them is how to crash.
