

Paper Strip Piecing Raw Edged Applique - A Quilter's Delight

Quilting is an art form that has been passed down through generations. From traditional patchwork to contemporary designs, quilting techniques continue to evolve. One such technique that has gained popularity is paper strip piecing raw edged applique. This unique technique combines the precision of paper piecing with the versatility of raw edged applique, resulting in stunning quilted creations. In this article, we will dive deep into the world of paper strip piecing raw edged applique, exploring its process, benefits, and the endless possibilities it offers to quilters.

Understanding Paper Strip Piecing

Paper strip piecing is a quilting technique that involves sewing fabric strips onto a foundation paper to create intricate designs. The foundation paper provides stability and accuracy during the piecing process. By following a designated pattern or template, quilters sew fabric strips one by one to the paper, ensuring precise alignment. Once all the strips are sewn, excess fabric is trimmed, revealing a beautifully pieced block. This technique allows quilters to achieve complex designs with ease and accuracy.

The Magic of Raw Edged Applique

Raw edged applique is a technique where fabric pieces are stitched onto a background fabric without turning the edges under. This method provides an edgy and modern look to traditional quilting projects. By cutting fabric shapes without seam allowances, they can be easily positioned and stitched onto the background fabric with a straight stitch or a decorative stitch. The raw edges add texture and

dimension to the final quilted piece, making it a perfect choice for contemporary and artistic quilts.

Combining the Techniques

Paper strip piecing raw edged applique takes the best of both worlds and merges them into a single technique. By using paper strip piecing as a foundation, quilters can easily create complex shapes and designs. The paper serves as a guide for accurate placement. Once the piecing is complete, the paper is removed, leaving behind a block with perfectly aligned strips. Now, the raw edged applique comes into play. By cutting fabric shapes with raw edges and placing them strategically on the pieced block, quilters can add depth, texture, and pops of color to their creations. The combination of these two techniques allows for endless possibilities and stunning outcomes.

The Process of Paper Strip Piecing Raw Edged Applique

To embark on your paper strip piecing raw edged applique journey, gather the following materials:

- Fabric strips in various colors
- Foundation paper or template
- Fabric for raw edged applique
- Thread and sewing machine
- Scissors or rotary cutter
- Iron and ironing board
- Pins or clips

Here is a step-by-step guide to get you started:

Step 1: Preparing the Foundation

Start by choosing a foundation paper or creating a template. If using a foundation paper, print or draw the desired design onto it. Ensure the paper is sturdy enough to withstand the sewing process. Trim excess paper if necessary. If working with a template, trace it onto the foundation paper before continuing to the next step.

Step 2: Paper Strip Piecing

Select your fabric strips and lay them out in the desired order. Take the first strip and place it right side up onto the paper, aligning it with the designated line or area. Secure it with pins or clips. Place the second strip right side down on top of the first strip, aligning the edges. Sew a straight stitch along the designated line or seam allowance. Flip the second strip over, press it flat with an iron, and trim any excess fabric. Repeat these steps for all the remaining strips, following the pattern or design.

Step 3: Removing the Foundation Paper

Once all the strips are sewn onto the foundation paper, it's time to remove it. Gently tear away the paper from the back of the pieced block, ensuring not to damage the fabric strips. If some parts are difficult to remove, you can dampen the paper slightly, making it easier to tear.

Step 4: Raw Edged Applique

Now it's time to add the raw edged applique. Select your fabric for applique and cut desired shapes without seam allowances. Lay out these shapes on the pieced block, experimenting with different arrangements until you find the desired design. Once satisfied with the layout, pin or clip the shapes in place. Using a straight stitch or a decorative stitch, sew along the edges of each fabric shape, securing them to the pieced block.

Step 5: Finishing Touches

After completing the raw edged applique, it's time to add any finishing touches. This can include additional quilting, embroidery, or embellishments to enhance the overall design. Once you are satisfied with your creation, press it flat with an iron, and your paper strip piecing raw edged applique masterpiece is ready to be admired.

The Benefits of Paper Strip Piecing Raw Edged Applique

Paper strip piecing raw edged applique offers numerous benefits for quilters. Firstly, it allows for intricate designs to be easily achieved with precise alignment. The paper strip piecing technique ensures accuracy and reduces the chances of misalignment or distortion. Additionally, raw edged applique adds texture and depth to the quilted piece, creating visual interest and a modern aesthetic. Quilters can experiment with endless fabric choices, colors, and layouts, making each creation unique. Lastly, this technique is suitable for all skill levels, from beginners to advanced quilters, offering a range of complexity levels to explore.

Paper strip piecing raw edged applique combines the best of both techniques to offer quilters a unique and versatile way to express their creativity. The precise piecing of fabric strips using foundation paper along with the edgy and modern touch of raw edged applique produces stunning quilted pieces that stand out. So, if you are a quilter looking to explore new techniques and push your creativity to new heights, give paper strip piecing raw edged applique a try. The possibilities are endless, and the results will leave you in awe!

Let's make a Halloween Cat!!

Quilt Karma patterns are designed to be big and bold and to allow you to bring your own unique, creative input. At Quilt Karma, we design patterns in new and innovative ways to bring quilts to life, utilizing raw edged applique of scrap and strip pieced paper patterns using fusible webbing. Patterns are simple enough for the beginner, but allow advanced quilters to be as elaborately imaginative as they desire. Detailed instructions are included with the pattern.

Finished pattern design 12" x 10"

SUPPLIES NEEDED

Fat Quarter (18" x 21") of each of the following:

Background fabric * Backing Fabric * Batting

Scraps and Pieces for:

* Fusible Webbing * Strip Piecing
