Earth is in turmoil.

The enemy is bearing down on us with every warship they have, and our only allies are in chaos.

Our one hope for survival is Andy Clanton - a hack science fiction writer trying to convince some aliens that humans are worth saving.

It's an uphill battle, because to the aliens, we are the monsters. We look just like their sworn enemies, the Tevynians, who've sworn to wipe out both our civilizations.

When everything falls apart and the fate of the galaxy is on the line, can Andy Clanton pull our fat out of the fire?

He's outnumbered, outgunned, and in way over his head.

But what else is new?
