

## **Saving Our History One Photo At Time Sampler Cruising**

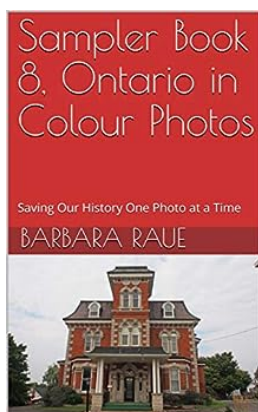

Have you ever stumbled upon an old photo album and felt an instant connection to the past? The ability of a single photograph to transport us through time is truly remarkable. It allows us to witness moments that shaped our history and

understand where we come from. In a world constantly evolving, preserving these glimpses of the past becomes vital.

## The Importance of Preserving History

History serves as a bridge that connects our past to our present. It offers insights into our traditions, cultures, and achievements. Preserving history is crucial to understanding ourselves and shaping our future. Among the various methods available, photographs play a significant role in capturing the essence of a particular time period.

### Sampler Book 8, Ontario in Colour Photos: Saving Our History One Photo at a Time (Sampler Cruising) by Barbara Raue (Kindle Edition)

Sampler cruising, a popular pastime in the late 19th and early 20th centuries, provides a perfect example of the relevance of photo preservation. Sampler cruising was a popular recreational activity in which individuals traveled aboard ships, collecting fabric swatches from different regions. These swatches were then stitched together to form a record of the journey. Each fabric piece carried a

unique story, reflecting the cultural diversity and experiences encountered during the travels.

## **Preserving Sampler Cruising History**

Sampler cruising is an integral part of our cultural heritage, and it is essential to preserve this unique chapter of our history. By saving one photo at a time, we can ensure that future generations are acquainted with this forgotten tradition.

Whether it's a picture of an individual collecting swatches on a ship or a beautifully stitched sampler, each photo serves as a portal into the past.

To ensure the longevity of these historical photos, it is crucial to adopt proper preservation techniques. Here are some steps you can take to safeguard your sampler cruising photographs:

1. **Handle with Care:** When handling old photographs, ensure your hands are clean and dry. Oils and moisture can damage the prints over time. Use gloves if available to prevent direct contact.
2. **Avoid Exposure to Light:** Ultraviolet (UV) radiation can fade and deteriorate photographs. Display images in areas with limited sunlight or use UV-protective glass when framing.
3. **Store in Acid-Free Materials:** Acidic materials can cause photographs to degrade. Use acid-free folders, archival sleeves, and boxes to prevent deterioration.
4. **Control Temperature and Humidity:** Extreme temperature and humidity fluctuations can lead to photo damage. Store photographs in a climate-controlled environment with stable conditions.
5. **Digitize for Future Generations:** Scanning your sampler cruising photographs is an effective way to create digital copies. This ensures their preservation

even if the original prints deteriorate.

## Sharing the Stories

Preserving photos from sampler cruises not only safeguards the history but also allows us to share captivating stories from the past. Each image has a tale to tell, whether it's about the hardworking sailors, the vibrant cultures encountered along the way, or the personal journeys undertaken by individuals. By sharing these stories, we keep the past alive and inspire others to explore their own cultural heritage.

With modern technology and the power of the internet, we have the opportunity to create digital archives dedicated to sampler cruising history. Online platforms, social media groups, and websites can serve as platforms for individuals to connect and share their findings. By collaborating, we can collectively piece together the puzzle of sampler cruising and bring this forgotten tradition back into the spotlight.

Preserving our history, one photo at a time, is a responsibility we all share. Sampler cruising, with its unique cultural significance, deserves recognition and preservation. By adopting proper preservation techniques and embracing digital platforms, we can ensure that the stories and moments captured in these photographs continue to inspire and educate future generations. Let us embark on this journey together, one snapshot at a time!

Each photo I take that precedes a demolition, or a natural disaster such as a tornado or a fire, is meeting this aim of mine of Saving Our History One Photo at a Time. There are more than 100 towns already photographed which you can visit without moving from your comfortable chair in your living room. Think about what it was like in those by-gone days. Imagine what it was like to live in a mansion like one of these.

Sampler Book 8 includes pictures from the following places: Belleville, Port Colborne, Erin, Goderich and Owen Sound.

All the photos in this book have been taken with my cameras. I own the rights to them. I only submit content for which I do have the exclusive publishing rights.
