What kind of person would benefit from reading this book?As Mr Jackson often reiterates, the logistics business has neither the time, inclination, nor sees a need to give any more than a very basic knowledge of what the new recruit should be doing. An assumption that a Satnav or the company guidance system is all they need he sees as being misguided and bad for business. On paper the business is simple. In reality it is not. The drop-out rate from those that are 'just having a go', 'see how they get on', is phenomenal. Good people are being wasted. And as one of the fastest-growing service industries in the world, it should be better.
