You might be thinking, why bother training chickens? Well, the benefits of training your chickens go beyond the satisfaction of having obedient birds. Trained chickens are easier to handle, making routine tasks such as health checks, clipping wings, and cleaning their coop less stressful. Moreover, trained chickens can perform fun tricks that will impress your friends and family. They can even participate in chicken agility competitions!

The Clicker Method

The clicker method is a proven and effective technique for training animals of all kinds, including chickens. It is based on operant conditioning, a form of learning where animals associate a specific behavior with a reward. The clicker acts as a

bridge between the behavior and the reward, helping chickens understand which action they should repeat to receive a treat.

By following this training course step-by-step, you will learn how to use the clicker to teach your chickens a wide range of commands and tricks. From simple commands like "come" and "stay," to more advanced tricks like "target training" and "weaving through poles," your chickens will become the stars of the backyard!

Getting Started: Setting up a Training Area

The first step in training your chickens is to create a designated training area. It should be a quiet, distraction-free space within the chicken coop or a separate enclosure. This area will be associated with training sessions, enabling your chickens to focus solely on learning and interacting with you.

Remember to make the training area comfortable for your chickens. Provide them with fresh water, food, and a variety of perches and toys to keep them entertained. A comfortable and stimulating environment will enhance their training experience and motivation.

Training Essentials: Clicker and Treats

Before you start training, you need a clicker and some tasty treats. The clicker should be a small handheld device that emits a distinctive clicking sound when pressed. This sound will mark the exact moment your chicken performs the desired behavior. It is essential to use the same clicker consistently throughout the training sessions.

Treats are the key motivators in chicken training. Find a treat that your chickens absolutely love, such as mealworms, grapes, or small pieces of corn. Make sure the treats are easy to eat quickly so that your chickens can consume them without delay, ensuring a seamless training process.

Step-by-Step Training Instructions

Now that you have set up the training area and gathered your training essentials, it's time to dive into the training process. We will go through each step of training, providing clear instructions along the way to ensure your success.

1. Clicker

In this step, we introduce the clicker to your chickens and create a positive association with the sound. By associating the clicker with tasty treats, your chickens will start to understand that the clicker means they have performed the desired behavior and will be rewarded.

2. Target Training

Target training is a fundamental skill that helps chickens understand how to respond to cues or objects. By teaching your chickens to target a specific object, such as a stick, your chickens will learn to associate the desired action with the object. This skill can be further developed into impressive tricks.

3. Basic Commands

Now that your chickens understand the concept of desired actions and rewards, it's time to move on to basic commands. Commands like "come," "stay," and "sit" can be easily taught using the clicker method. These commands are especially useful for everyday handling tasks and keeping your chickens safe.

4. Advanced Tricks

Once your chickens have mastered the basic commands, you can move on to teaching them more advanced tricks. From "weaving through poles" to "playing dead," the possibilities are endless. Explore different tricks based on your chickens' abilities and personality, and enjoy the fun journey of discovering their unique talents.

Training chickens using the clicker method is a rewarding and enjoyable experience for both you and your feathered friends. With patience, consistency, and a positive attitude, you can transform your backyard chickens into well-behaved companions that never fail to amaze.

So, are you ready to embark on this exciting chicken training journey? Get your clicker, treats, and motivation ready because the ultimate chicken training course awaits!

Chickens Are Smarter Than You Think

Your chicken can do anything a dog can do if you train it right! Hens and roosters can be ordered to go to the coop, perch on your arm, come when called, and generally respond and behave as you wish. This book presents an effective training program to get domesticated chickens to follow a variety of commands. Animal behavior specialist Giene Keyes shows how to use the positive reinforcement of clicker training to effectively manage your flock. Giene explains how a chicken thinks and socializes, expanding the range of what you may know about communicating with animals. Dog owners especially will find that working with chickens helps sharpen observation and timing skills that keep your animal engaged. Training chickens is fun too! Amaze your friends as your birds perform tricks like circling a cone, turning around, sitting down, and recognizing colors and patterns.

Inside Click with Your Chick

- Understand and connect with your chickens to effectively manage your flock
- Clicker-train your chickens to follow fun and practical commands
- Discover how a chicken thinks and socializes, and how to make that knowledge work in your favor
- Learn how to use operant conditioning, luring, and positive training methods on hens and roosters
- Gain insight for training any animal by improving observation skills and timing
