Do you remember the previously mentioned responsibilities of your organizations teams?

How and why do organizational factors influence the adaptation of an agile approach?

How easy will it be to shift the hearts and minds of the people working on projects?

How to create a Kanban board for Agile management to visualize/drag/drop tasks?

How would you also suggest selling, for want of a better word, Agile to executive staff?

Is the team ready to immerse themselves, and engage the customer, in an agile approach?

Is there a clear, early commitment from user representatives and the broader user base?

What people factors should be considered when managing an Agile team to make it effective?

What would be the point of reviews, if the code can and will change soon after the review?

Why and for what did a strategic management group choose to adopt a lean and agile design?

This Agile Management Guide is unlike books you're used to. If you're looking for a textbook, this might not be for you. This book and its included digital components is for you who understands the importance of asking great questions. This gives you the questions to uncover the Agile Management challenges you're facing and generate better solutions to solve those problems.

Defining, designing, creating, and implementing a process to solve a challenge or meet an objective is the most valuable role... In EVERY group, company, organization and department.

Unless you're talking a one-time, single-use project, there should be a process. That process needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?'

This Self-Assessment empowers people to do just that - whether their title is entrepreneur, manager, consultant, (Vice-)President, CxO etc... - they are the people who rule the future. They are the person who asks the right questions to make Agile Management investments work better.

This Agile Management All-Inclusive Self-Assessment enables You to be that person.

INCLUDES all the tools you need to an in-depth Agile Management Self-Assessment. Featuring new and updated case-based questions, organized into seven core levels of Agile Management maturity, this Self-Assessment will help you identify areas in which Agile Management improvements can be made.

In using the questions you will be better able to:

Diagnose Agile Management projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices.

Implement evidence-based best practice strategies aligned with overall goals.

Integrate recent advances in Agile Management and process design strategies into practice according to best practice guidelines.

Using the Self-Assessment tool gives you the Agile Management Scorecard, enabling you to develop a clear picture of which Agile Management areas need attention.

Your purchase includes access to the Agile Management self-assessment digital components which gives you your dynamically prioritized projects-ready tool that enables you to define, show and lead your organization exactly with what's important.
