Legend has it that Silkies were brought to Europe by Marco Polo during his travels. Over time, they spread to different countries and gained popularity for their striking appearance and gentle nature. Today, Silkies are beloved worldwide for their docile temperament and their ability to make great pets for children and adults alike.

Chapter 2: Physical Characteristics

One of the most distinctive features of Silkies is their fluffy feathers that resemble fur or silky hair. These feathers lack barbicels, giving them a soft and smooth texture. Silkies come in various colors, including black, white, blue, partridge, and buff. Their skin is unique too, having a dark bluish or purplish tint, which sets them apart from other chicken breeds.

Another fascinating characteristic of Silkies is their feathered legs and feet. They have an abundance of soft feathers that envelop their legs, making them look like

they're wearing fluffy boots. These leg feathers, commonly referred to as "pantaloonies," give Silkies a distinct and charming appearance.

Chapter 3: Caring for Silkies

When it comes to caring for Silkies, they require some special attention due to their feathering and leg feathers. Here are some essential tips to ensure your Silkies thrive:

- **Housing:** Silkies require a secure coop to protect them from predators. Ensure the coop has proper ventilation, bedding, and suitable nesting boxes.
- **Feeding:** Provide a balanced diet of nutritious chicken feed supplemented with occasional treats like fruits and vegetables.
- **Grooming:** Regularly check and clean Silkies' feathers to prevent matting, particularly on their crest and leg feathers.
- **Healthcare:** Stay vigilant for common chicken diseases and parasites. Regularly inspect Silkies for signs of illness and consult a veterinarian if necessary.
- **Socialization:** Silkies are sociable birds and thrive in the company of other chickens. Allow them to interact with their flockmates for their overall wellbeing.

Chapter 4: Silkies' Behavior and Temperament

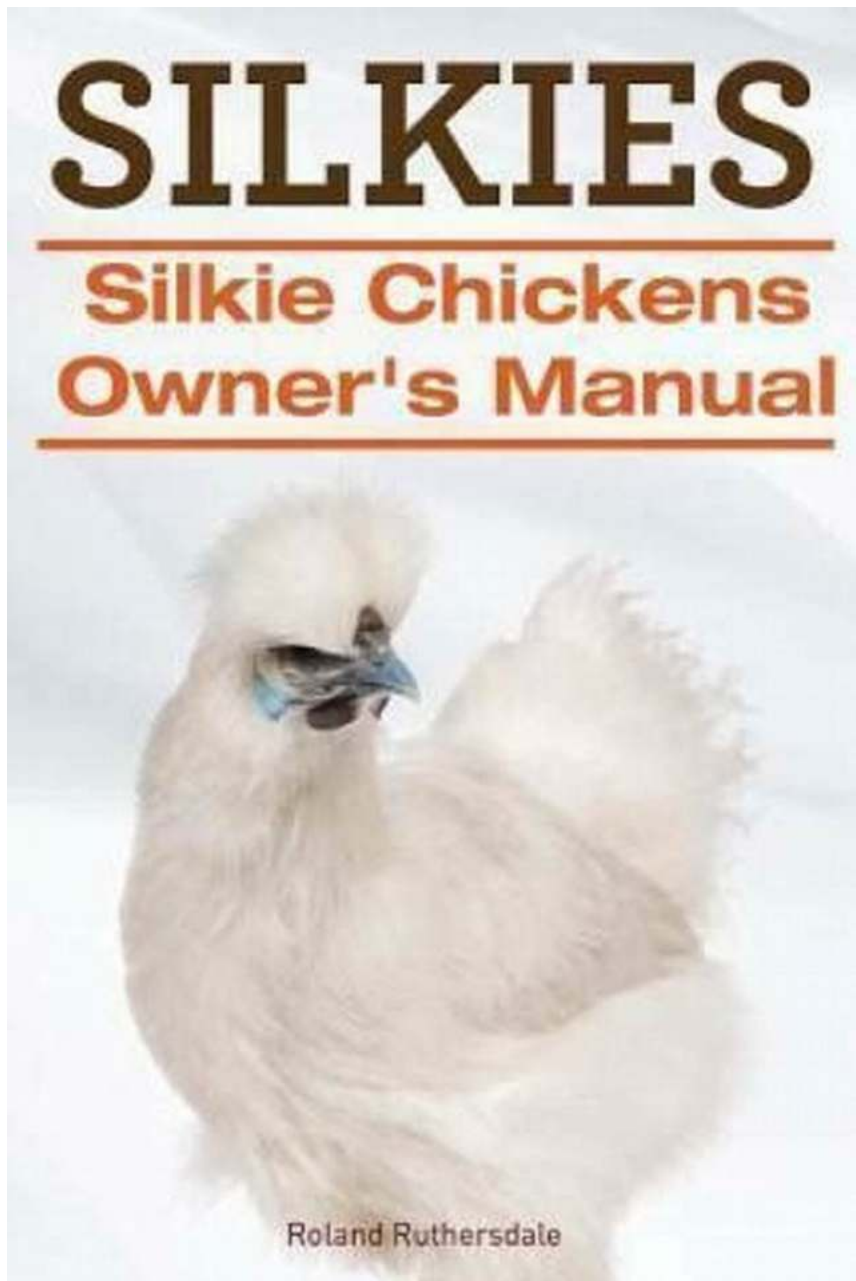

Silkies are known for their friendly and docile nature, making them excellent companions for families and individuals alike. They are not particularly flighty birds and are known to be relatively calm when handled. Silkies are great for raising with children as they are gentle and tolerant of human interaction.

While Silkies are not prolific egg layers, they make up for it with their broodiness. Silkies have a tendency to go broody more frequently than other breeds, which means they have a strong inclination to sit on and hatch eggs. This trait earned them the nickname "The Little Incubators." They're also known to be exceptional mothers, caring for their chicks with utmost dedication.

The Silkie Chicken, which is believed to be of oriental descent is one of the most unique chicken breeds that you will ever see. The fortunate absence of a structure called the Barcibel makes the feathers of this beautiful bird look unattached and extremely fluffy. These birds are primarily owned for ornamental and showing purposes. However, commercially, they are put to use for something entirely different.

Usually, the Silkie is used commercially to hatch the eggs of other chickens. The fact that this bird is such a good brooder and mother, makes it popular among breeders who want another breed to babysit the chicks. They are also extremely calm and docile, making them the perfect backyard chickens. In fact, this small sized bird is considered the friendliest of all the chicken breeds. Not to mention, it is also extremely adorable and cuddly!

If you are a first time chicken owner, this book is your comprehensive guide to chicken care. Everything that you need to know about the health and proper development of your birds is in this book. This book takes you step by step

through various chicken care practises that can be slightly intimidating for first time pet owners.
