## What is Corner To Corner Crochet?

Corner To Corner Crochet, commonly known as C2C crochet, is a technique that creates textured and visually striking designs using diagonal rows. Unlike traditional crochet, which typically involves stitching back and forth in horizontal or vertical rows, C2C crochet is worked diagonally, from corner to corner.

The unique diagonal construction of C2C crochet allows for the creation of patterns ranging from simple squares to intricate images and motifs. By using basic stitches, such as chains and double crochets, and increasing or decreasing the number of stitches in each row, you can effortlessly bring your designs to life.
