What is more fun and easy than crocheting realistic looking snakes? (as well as a mythical magical rainbow snake....) To give variety, some of the snakes in this book are worked in the round, and some are worked in rows. They also vary in size, from 22" long to 52" long. Kids love snakes, and so do adults (well, most adults... a few are scared of them - make these snakes especially for the adults that are scared of them! haha). If you don't have a ton of experience with crochet, don't worry - these patterns are easy! They have some increases, decreases, and color changes, but they only use basic stitches and I give some extra photos and explanations so you can complete the patterns with success.
