## SPY ROBOT

In the 50's, the aliens carried out a number of invasions to the planet earth.

They appointed a few robots to study life on earth. Out of sixteen robots, only one survived.

In the year of 1995, ten-year-old Tony dug a hole in his house's yard and found the robot.

Tony played with the robot and went to sleep with it. At night, when Tony slept, the robot would wander around the house and film what's occurring.

The aliens watched Tony's life through the eyes of the robot and learned about the human race.

They learned that children, such as Tony, play with a ball and look at a screen called television.

One night, when Tony went to bed, his parents started to fight, actually screaming at each other.

The robot filmed everything and the aliens noticed how the parents use the words "I hate you", so they started to research the meaning of the word 'hate'.

While they researched it, they discovered all the evils of the planet earth. They discovered the wars which occurred there, and the worst war of all, the Second World War, where one man caused the death of more than 64 million people- in the same damned war in the name of hate.

After the aliens realized that murder of humans by humans occurs again and again in the planet earth, they decided to destroy it.
