The novel tells the story of a seaside summer at the Baltic Sea in a polyperspective, seemingly as an idyll, but on closer inspection as a social tragedy, at the focus of which are the painter Hans Grill, who distinguishes himself as a free thinker, and his wife Doralice, who has separated from her older husband Count Köhne-Jasky, who is of a certain status, in order to live with Hans. Countess Palikow's family (her companion, her daughter Baroness von Buttlär, her husband, both children Wedig, Nini and Lolo, as well as Lolo's fiancé, Lieutenant Hilmar) and the faded Privy Councillor Knospelius complete the ensemble of characters.

While Doralice feels misunderstood by Hans, who considers class boundaries to be null and void and, as a seemingly self-assured lover, does not want to curtail his wife's company, in her conflict between abandoned social rank and the need to lean on her husband, both Baron von Buttlär and Lieutenant Hilmar, but above all Lolo, fall for her because she seems to embody the successful escape from the aristocratic world and its ossified conventions. Doralice, who is all too aware that she is no longer socially acceptable due to her divorce, enjoys the holiday courtships of her former social equals.

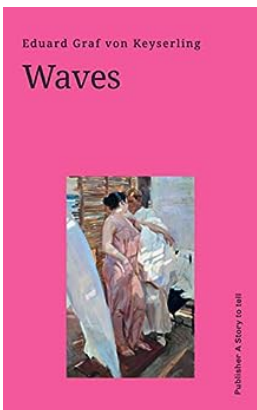

The novel culminates in the birthday party of Privy Councillor Knospelius, in the wake of which Hilmar makes a passionate proposal to Doralice, which she rejects, and Lolo attempts to take her own life by swimming out to sea. Instead of her, Hans dies, not returning from a trip out to sea. Doralice remains in the small fishing village beyond the time of the summer retreat - Countess Palikow's family has long since departed - together with Knospelius, who offers her his company for a trip south.

The secret protagonist of the novel are the titular waves, the Baltic Sea, the sea. They symbolise the infinite, constantly changing life and thus the constancy of nature in the change of weather as well as in the cyclical renewal of the day and seasons, uninfluenced by the inner mood of the characters, which nevertheless has an effect on them. Keyserling creates the contrast between their constant movement and the frozen conventions of the world in which his characters - each one of them individually - remain emotionally trapped.
