Known for his influential ideas on postcolonial theory, Said examines the complex relationship between culture and imperialism, exploring how literature and discourse have shaped and reinforced colonial power structures. This literary masterpiece challenges prevailing notions of Western superiority and highlights the pervasive influence of imperialism on contemporary society.

The Core Ideas Explored

In his book, Said argues that culture cannot be divorced from imperialism. He asserts that literature, art, and discourse not only reflect but also perpetuate imperialist ideologies. By carefully analyzing a myriad of literary works by renowned authors like Jane Austen, Joseph Conrad, and Graham Greene, Said exposes the underlying imperialist narratives embedded within these seemingly innocent texts. Through detailed close readings, he uncovers subtle forms of

domination, orientalism, and racial prejudices that have long been synonymous with Western representations of the "Other."
