As a viral pandemic turns the world into bloodthirsty creatures, a boy with special needs looks for his missing mum.

Imagine a country broken by a virus. Society falls apart. Nothing works now. Nobody knows what has happened. There are no answers. No knowledge. No rules. No science. No God. The only truth now is the desperate fight for survival. Imagine all of this seen through the eyes of a boy with special needs.

Jake wakes one morning to find his life is broken. His mum has gone missing. The world has fallen apart. Determined to find her, Jake is forced to come to terms with what has happened to the world. Confronted by the horror, he initially struggles to make sense of everything.

Helped by the new friends he makes, Ellis, kind and resourceful, and the twins, Amber and Abe, Jake starts to develop his independence. Forced to confront the apparent difference defined

by his special needs, Jake realises that this difference doesn't matter any more. This gives him the strength to keep going.

As they fight for survival, the four kids meet a wide range of other people also battling to stay alive and with each encounter Jake and his new friends learn a little bit more about themselves and each other. Ultimately, Jake's story is one of hope and determination in the face of complete and utter devastation.

'This review is for the series. Capturing the voice of a young character with special needs (I spent 25 years as a special education teacher/administrator), Taylor's story of a group of young people coping with a world disintegrating in front of them; with the loss of structure and trust, and with betrayal by the adults who should be protecting them is both uplifting and horrifying. Do not be fooled by the simple language of the narrator: there are hard questions asked and realistic, unsentimental consequences to the apocalypse confronting the children, and an ending that you are unlikely to forget easily.'

'Barnaby Taylor has a daring and rich imagination that transports you to new adventures in a re-imagined world, that are vividly written with a fresh and vibrant use of language. [...] Barnaby can really write an action packed scene with fear inspiring characters such as the Tall Man. Baxter the dog who accompanies the children gives the story the delightful twist of feeling like an apocalyptic Famous Five. Genius.'

'The writing style is beautifully compelling, and after the first couple of pages I couldn't put it down. The author very skilfully creates a world and characters through deceptively simple prose that draws the reader right in. It is a fascinating blend of one-after-the-other edge-of-the seat scares, alongside a haunting narrative about what it is to be human.'

'Barnaby is an exciting and passionate writer. There's real depth of meaning behind his books. You emotionally engage with and care about the book's characters. Barnaby's books also have a strong visual sensibility. His stories particularly Viro I and II would translate superbly to television and cinema. I am a huge fan of all things zombie orientated and to see the zombie genre reinterpreted from the perspective of children is thrilling. I look forward to more books from Barnaby. He's one to watch out for. Children, adults and I suspect the film and TV industry people will love this book. I highly recommend it.'

'I absolutely loved this book. Powerful and poignant, 'Viro' packs a punch. Sad and haunting, 'Viro' is a new take on the zombie genre. The characters are dynamic and interesting, finding strength despite their horrifying circumstances. Jake is a character that will stick with you long after the final page. The action sequences are thrilling. I was on the edge of my seat!'
