Agile methodologies, such as Scrum, Kanban, and Lean, promote transparency, effective communication, and teamwork, ultimately leading to faster project delivery and enhanced customer satisfaction.

The Scrum framework consists of predefined roles, including the Product Owner, Scrum Master, and Development Team. It also introduces time-bound iterations called sprints, typically lasting two to four weeks. During each sprint, the team collaborates closely, leveraging daily stand-up meetings, backlog refinement, and sprint planning sessions to ensure project goals are met.
